Teacher’s Manual

Structure of the Teacher’s Book:

The Teaching Notes offer easy-to-follow lessons and helpful recommendations on how to present the lesson, questioning strategies that include all levels of Bloom’s Taxonomy, activities involving practice and enrichment, brief reviews of the prerequisite skills needed, and a suggested pace for each lesson. Each objective is sectioned by tabs for ease of use.

Essential vocabulary that gives a listing of important terms associated with the TEKS.

Manipulatives that can be used to develop concepts.

Transparencies to help teachers introduce key vocabulary and activities that lead into a lesson.

Teaching Tools provide accessible teaching aids to save time and energy.

Structure of the Student’s Practice Book

Contains the following key components:

Practice Sheets provide additional practice of the skills and concepts taught in the lessons including real-world contexts to highlight the relevancy of the topic while allowing students to put their knowledge to work.

Skills Review Sheets provide a summary of skills learned throughout the year to help students retain ideas.

Practice problems in multiple-choice format give TAKS practice.

Sample Tests provides a comprehensive measure of students’ performance on major concepts covered.

Objective 1	Number and Operations	1
Objective 2	Patterns, Relationships and Algebraic Thinking	90
Objective 3	Measurement	133
Objective 4	Geometry	161
Objective 5	Probability and Statistics	190
Objective 6	Underlying Tools and Mathematical Processes	214
